INDEX

A

ATPase, extraction of from sea urchin and fish sperm tails, 381 (abstract).
ATPase activities and adenylate kinase in Spisula and Asterias eggs, 374 (abstract).
ABBOTT, B. C. See M. J. PAK, 382 (abstract).
Abstracts of papers presented at the Marine Biological Laboratory, 353.
Acartia, salinity tolerances of, 108.
Acceleration of recovery of phosphorylation in irradiated cellular particulates, 173.
Acid phosphatase in invertebrate eggs, localization of, 389 (abstract).
Acmaea, development of, 294.
Acoustic orientation of bats, 478.
Activation energy of mollusc ribonucleases, 489.
Activity patterns of Spiochaetopterus, 397.
Adaptation of magnetoreceptive mechanism of snails to geomagnetic strength, 221.
ADELMAN, W. J., JR., AND F. M. DYRO. Relation of hyperpolarizing response to potassium conductance in internally perfused squid axons, 361 (abstract).
ADKISSON, P. L. See C. M. WILLIAMS, 511.
Adult male Pyrrhocoris, metabolism of, 499.
Aedes, effects of apholate on, 119.
Aggregation of slime mold, effect of light on, 85.
Alaska, sun compass orientation of pigeons displaced to, 154.
Alkylating agent, effect of on mosquito reproduction, 119.
Allatectomized Pyrrhocoris, metabolism of, 499.
ALLEN, M. J. Embryological development of the syllid, Autolytus, 187.
Amino acid receptors in crabs, 428.
Amino acids in Nephtys coelomic fluid, 63.
Amoeba, effects of mercaptoethanol on form and movement of, 538.
Amphibian development, anaerobic glycolysis in, 256.
Amphibian epidermis, sequential induction of, 413.
Amphibian larvae, serum antibody synthesis in, 232.
Amphibious crabs, water and salt regulation in, 447.
Anaerobic development in amphibian development, 256.
Anatomy of Aedes sexual apparatus, 324.
Anatomy of Spiochaetopterus, 397.
Anaerobiosis, effect of on snail behavior, 271.
Annelid, biochemistry of coelomic fluid of, 63.
Annelid, development of (Autolytus), 187.
Annelid, tube-building and feeding in, 397.
Annual Report of the Marine Biological Laboratory, 1.
Anomuran, intermolt cycle of, 97.
Anoxia, effect of on snail behavior, 271.
Antennary glands of crabs, role of in salt and water regulation, 447.
Antherea, photoperiodic control of diapause in, 511.
Antibody synthesis in bullfrog larvae, 232.
Antimitotic effects of heavy water, reversal of by high pressure, 356, 380 (abstracts).
Anuran larvae, immunology of, 232.
Apholate, effect of on mosquitoes, 119.
Aquatic crabs, water and salt regulation in, 447.
Arbacia eggs and oocytes, jelly coat, 132.
Arctic Circle, sun compass orientation of pigeons displaced north of, 154.
AUCLAIR, W. On the chromosome number of Arbacia, 359 (abstract).
AUSTIN, C. R. See J. F. FALLON, 369 (abstract).
Autolytus, embryology of, 187.
Autoradiography of Strongylocentrotus gut, 280.

B

Background, role of in pigmentation of Uca, 239.
Bacterial infection of Limulus, 390 (abstract).
BANG, F. B. See H. RABIN, 385 (abstract).
Barnacle, salinity tolerances of, 108.
BARNES, R. D. Tube-building and feeding in the chaetopterid polychaete, Spiochaetopterus, 397.
BARNHILL, R. See R. GUTTMAN, 372 (abstract).

Barnwell, F. H. See F. A. Brown, Jr., 206, 221.
Barth, L. G., and L. J. Barth. Sequential induction of the presumptive epidermis of the Rana gastrula, 413.
Basic dyes, effects of on sea urchin egg jelly coat, 132.
Bauer, G. E., G. Lester and A. Lazarow. Studies on the subcellular sites of protein synthesis in goosefish islet tissue, 361 (abstract).
Beatty, R. A. Density gradient media for mammalian spermatozoa, 354 (abstract).
Beck, L. H. See H. T. Yost, Jr., 173, 526.
Behavior, homing, of northern-displaced pigeons, 154.
Behavior of bat in echolocation of flying insects, 478.
Behavior patterns in copulation of Aedes, 324.
Bennett, M. V. L., M. Giménez, Y. Nakajima and G. D. Pappas. Spinal and medullary nuclei controlling electric organ in the eel, Electrophorus, 362 (abstract).
Biggers, J. D. See B. D. Moore, 381 (abstract).
Billiar, R. B., J. C. Brungard and C. A. Villee. Effects of D-malate on production and activity of L-malate dehydrogenases in developing sea urchin eggs, 362 (abstract).
Biochemistry of Nephtys coelomic fluid, 63.
Bioluminescence in Jamaican fireflies, 159.
Boring mollusks, use of polished shell for testing demineralization activity of, 365 (abstract).
Bownds, D., and G. Wald. The reaction of sodium borohydride with rhodopsin and intermediates of its bleaching, 359 (abstract).
Brain, role of in control of diapause of Antherea, 511.
Brandt, P. W. See P. B. Dunham, 368 (abstract).
Branham, J. M. A method of rating sea urchin sperm motility, 363 (abstract).
Branham, J. M. Senescence of Arbacia sperm, 363 (abstract).
Breeding season of Acmaea, 294.
Breeding season of Autolytus, 187.
Brown, F. A., Jr., F. H. Barnwell and H. M. Webb. Adaptation of the magnetoreceptive mechanism of mud-snails to geomagnetic strength, 221.
Brown, F. A., Jr., H. M. Webb and F. H. Barnwell. A compass directional phenomenon in mud-snails and its relation to magnetism, 206.
Brungard, J. C. See R. B. Billiar, 362 (abstract).
Buccinum, temperature coefficient of ribonucleases of, 489.
Buchsbaum, V. Effects of temperature on reaggregation of sponge cells, 364 (abstract).
Buck, J. B. See H. H. Seliger, 159.
Bullfrog larvae, serum antibody synthesis in, 232.
Burns, E. R. See A. M. Mun, 467.
Bush, L. Distribution and behavior of some marine Turbellaria of the Woods Hole region, 364 (abstract).

C

Calcium concentrations in blood of crabs, 447.
Cancer (crab), water and salt regulation in, 447.
Carbohydrate, fluctuations in, in Cape Cod pond, 395 (abstract).
Carbohydrate distribution in Nephtys coelomic fluid, 63.
Carbon dioxide, effect of on cell aggregation of slime mold, 85.
Carbon dioxide, effect of on Taphius distress syndrome, 271.
Carcinus larvae, salinity tolerances of, 108.
Carden, G. A., III, and H. S. Rosenkranz. Preliminary studies on the DNAs isolated from haploid and diploid cells of Arbacia, 365 (abstract).
Carden, G. A., III. See H. S. Rosenkranz, 387 (abstract).
Carriker, M. R., and D. van Zandt. Use of polished mollusk shell for testing demineralization activity of accessory boring organ of muricid boring gastropods, 365 (abstract).
Carter, J. C. H. A preliminary survey of the calanoid copepods of certain embayments and estuaries of Cape Cod, 365 (abstract).
Cartilage in a marine polychaete, 357 (abstract).
Case, J. Properties of the dactyl chemoreceptors of Cancer, 428.
Cecropia silkworm, possible presence of mRNA in, during diapause, 378 (abstract).
Cell aggregation of slime mold, effect of light on, 85.
Cell division in Paramecium, delay of, induced by fluorophenylalanine, 386 (abstract).
Cell interaction in chick splenomegaly, 467.
Cellular particulates, irradiation of, 173, 526.

Cenozoic barnacle, re-evaluation of, 360 (abstract).
Centrifuge-pressure studies on Arbacia eggs, 345.
Centropages, salinity tolerances of, 108.
Chaetopterid, tube-building and feeding in, 397.
Change in color pattern in Uca, 239.
Changes in biochemistry of Nephtys coelomic fluid, 63.
CHASIS, J. See W. TROLL, 394 (abstract).
Chelipods of Cancer, chemoreception in, 428.
Chemoreceptors of Cancer, dactyl, properties of, 428.
Chemosterilants, cytogenetic effects of on mosquitoes, 119.
Chemotactant of Campanularia, isolation of, 381 (abstract).
CHENEY, R. H. See C. C. SPEIDEL, 353 (abstract).
Chick embryo, cell interaction in splenomegaly of, 467.
Chilonycteris, echolocation of flying insects by, 478.
Chloride fluxes in crayfish muscle fibers, 368 (abstract).
Chorioallantoic grafting in chick embryo, 467.
Chromatography of mollusc ribonucleases, 489.
Chromatography of Nephtys coelomic fluid, 63.
Chromatophorotropins, role of in formation of Uca black pigment, 239.
Chromosome number of Arbacia, 359, 370 (abstracts).
Chromosome number of Autolytus, 187.
Chromosomes of Drosophila, specific puff induction in, by tryptophan, 369 (abstract).
Ciliate, effects of actinomycin D on head regeneration in, 393 (abstract).
CLAFF, C. L., AND A. A. CRESCENZI. The shark as an experimental organism, 366 (abstract).
CLARK, M. E. Biochemical studies on the coelomic fluid of Nephtys, with observations on changes during different physiological states, 63.
Cleavage of Acmaea, 294.
Cleavage of Arbacia eggs, effects of mercaptoethanol on, 345.
Cleavage of Autolytus, 187.
Cobalt-60 irradiation of rats, 173.
Coefficient, temperature, of mollusc ribonucleases, 489.
Coelomic fluid of Nephtys, biochemistry of, 63.
Collagens, soluble, of dogfish skin, 369 (abstract).
Color change in Uca, 239.
Compass directional phenomenon in mud-snails, 206.
CONNELL, G. M., AND G. KALEY. Evidence for the presence of "renin" in kidneys of marine fish and amphibia, 366 (abstract).
Control, photoperiodic, of diapause in Antherea, 511.
COOPER, E. L., W. PINKERTON AND W. H. HILDEMANN. Serum antibody synthesis in larvae of the bullfrog, Rana, 232.
COOPERSTEIN, S. J. See D. WATKINS, 395 (abstract).
COPELAND, E. Gas secretion in teleost swimbladder, Fundulus and Opsanus, 367 (abstract).
COPELAND, E. Salt-absorbing cells in gills of crabs, Callinectes and Carcinus, 367 (abstract).
Copepods, calanoid, of Cape Cod, 365 (abstract).
Copepods, salinity tolerance of, 108.
Copulation in Aedes, 324.
Cortical changes in cleaving Arbacia eggs, effects of mercaptoethanol on, 345.
Crab, fiddler, color change in, 239.
Crab, intermolt cycle of, 97.
Crab dactyl chemoreceptors, properties of, 428.
Crabs, water and salt regulation in, 447.
CRESCENZI, A. See C. L. CLAFF, 366 (abstract).
Crustacean, intermolt cycle of, 97.
Crustacean, properties of dactyl chemoreceptors of, 428.
Crustacean, water and salt regulation in, 447.
Crustaceans, salinity tolerances of, 108.
Cycle, intermolt, of Petrolisthes, 97.
Cycles of response to photoperiod in dragonfly, 304.
Cyclic aspects of snail orientation, 206.
Cytogenetic effects of chemosterilants in mosquitoes, 119.
Cytokinesis, new concept of mechanism of, 389 (abstract).
Cytokinesis of Arbacia eggs, effects of mercaptoethanol on, 345.

D

DNA in Arbacia, 394 (abstract).
DNA base composition of a red alga, Griffithsia, 375 (abstract).
DNA of dogfish cornea, 378 (abstract).
DNA molecules, alignment of during Loligo spermiogenesis, 357 (abstract).
DNAs from haploid and diploid Arbacia cells, 365 (abstract).
DNase of Griffithsia, separation of from phycoerythrin, 383 (abstract).
Dactyl chemoreceptors of Cancer, properties of, 428.

Darkness, effect of on cell aggregation of slime mold, 85.
Darkness, role of in control of diapause of Antherea, 511.
Darkness, effect of on dragonfly nymphs, 304.
Darkness, effect of on orientation of northern-displaced pigeons, 154.
Day-length, effect of on dragonfly metamorphosis, 304.
Day-length, role of in diapause of silkworms, 511.
Decapod crustacean, intermolt cycle of, 97.
Density gradient media for mammalian sperm, 354 (abstract).
Developing amphibian, immunology of, 232.
Developing Arbacia, amino acid incorporation by isolated mitochondrial fractions of, 386 (abstract).
Developing chick, cell interaction in splenomegaly of, 467.
Development of Acmaea, 294.
Development of amphibian, anaerobic glycolysis in, 256.
Development of Antherea, 511.
Development of Autolytus, 187.
Development of dragonfly, 304.
Development of heat-treated Arbacia eggs, 370 (abstract).
Development of Pinnotheres, 384 (abstract).
Development of Rana epidermis in vitro, 413.
Diapause, insect, physiology of, 511.
Diapause of dragonfly, effect of photoperiod on, 304.
Diapause of Pyrrhocoris, metabolism during, 499.
Digestive gland ribonucleases of molluscs, 489.
Diphotus, flash patterns in, 159.
Directional phenomenon in snails, relation of to magnetism, 206, 221.
Disulfide groups, importance of in cleavage of Arbacia eggs, 345.
Disulfide groups, importance of in form and mobility of amoebae, 538.
Division of Arbacia eggs, effects of mercaptoethanol on, 345.
Dixit, P. K. See D. Watkins, 395 (abstract).
Donor-host cell interaction in chick splenomegaly, 467.
"Dopa" as possible melanin precursor in Uca, 239.
Dragonfly, life-history and photoperiodic responses of, 304.
Driscoll, A. L. Relationship of mesh opening to faunal counts in a quantitative benthic study of Hadley Harbor, 368 (abstract).
Driscoll, A. L. See R. H. Parker, 360 (abstract).
Drosophila, echolocation of by bats, 478.
Dugesia homogenates, succinoxidase activity in, 317.
Dunham, P. B., J. P. Reuben and P. W. Brandt. Chloride fluxes in crayfish muscle fibers after vesiculation of transverse tubular system and after treatment with procaine, 368 (abstract).
Dyes, effects of on sea urchin egg jelly coat, 132.
Dyro, F. M. See W. J. Adelman, 361 (abstract).

E

Ecdysis cycle of Petrolisthes, 97.
Echinoderm eggs, effects of mercaptoethanol on furrowing capacity of, 345.
Echinoderm eggs and oocytes, jelly coat of, 132.
Echinoderm gut, histochemistry of, 280.
Echolocation of flying insects by Chilonycteris, 478.
Ecology of Nephtys, in relation to biochemistry of coelomic fluid, 63.
Effects of chemosterilants on mosquitoes, 119.
Effects of gases on distress syndrome in Taphius, 271.
Effects of mercaptoethanol on form and movement in Amoeba, 538.
Effects of mercaptoethanol on furrowing capacity of marine eggs, 345.
Egg production in apholate-treated mosquitoes, 119.
Eggs of Acmaea, development of, 294.
Eggs, Arbacia, effects of mercaptoethanol on furrowing capacity of, 345.
Eggs of sea urchin, jelly coat of, 132.
Electron microscopy of Nereis gamete activation reactions, 369 (abstract).
Electrophysiology of Cancer dactyl chemoreceptors, 428.
Electrophysiology of eel spinal and medullary nuclei, 362 (abstract).
Elminius, salinity tolerances of, 108.
Embryo chick, cell interaction in splenomegaly of, 467.
Embryological development of Autolytus, 187.
Embryology of Acmaea, 294.
Embryology of Rana epidermis in vitro, 413.
Endocrine mechanism for photoperiodic control of diapause in Antherea, 511.
Endocrinology of Pyrrhocoris, 499.
Energetics of hybrid frog development, 256.
Environmental factors, role of in cell aggregation of slime mold, 85.

Environmental and faunal variability, small-scale, preliminary quantitative study of, 360 (abstract).
Enzyme activity in planarian homogenates, 317.
Enzyme kinetics of gastropod ribonucleases, 489.
Epidermis of Rana gastrula, sequential induction of, 413.
Estuarine planktonic crustaceans, salinity tolerances of, 108.
Eyestalkless Uca, studies on pigment of, 239.

F

FALLON, J. C., AND C. R. AUSTIN. A fine-structure study of the activation reactions of Nereis gametes, 369 (abstract).
FARMANFARMAIAN, A. See C. RUNDLES, 387 (abstract).
